

RGAs Request Form

This Form is intended for use by MTH Distributors only. Please [find your distributor](#) or contact your area's representative for further assistance.

In order to receive an RGA number, this form must be completely filled in.

All returned items must be shipped prepaid to MTH Tool Company. Any shipments returned collect will be refused.

Please provide adequate packaging to prevent damages during transit (Foam Peanuts and/or Stuffing Paper Are Not Sufficient). Failure to do so may result in damages that would not be the liability of the MTH Tool Company.

Remove any piping or fittings from pumps as they will not be returned.

Applications where fluids other than clean water or ethylene glycol are used, will not be issued an RGA unless an MSDS sheet is sent with the RGA Request. The pump must then be thoroughly flushed prior to return. Pumps containing unidentified fluids, without prior receipt of an MSDS sheet, will be refused at the dock.
